For information about trials, please contact Sarah Laux at [Laux.sarah@moesc.net](mailto:Laux.sarah@moesc.net)

## What is indieGo ?

indieGo is an easy to use power mobility device that can quickly adapt to almost any manual wheelchair without the use of tools.

To use indieGo, roll the wheelchair backward up the ramps and into the two independent wheel cradles. Once the wheelchair is seated on the device, the user can use their manual chair as a power chair. When power is no longer needed, they can simply roll off.

indieGo can be used as a personal mobility device, a therapeutic training tool or as a shared device for large venues or parks.
