

TEACHING INSIDE OF THE BOX

SEPTEMBER 26, 2019

6 HOURS OF GIFTED PD

ABOUT THIS SESSION

As teachers of the gifted we often encourage our students to be creative and think outside of the box, but we are seldom supported in doing so within our schools and classrooms. Instead, we are confronted with ever increasing demands on our time and limited resources, and somehow are expected to continually do more with less. In this professional learning experience, we will create a roadmap of strategies to prioritize what gets piled on our plates and learn to overcome the obstacles and barriers tossed in our in our path. We **will transform your content from what you have to teach to engaging experiences** that we want to share with our gifted students. Rather than focusing on thinking outside of the box, true creativity in teaching resides inside of the box.

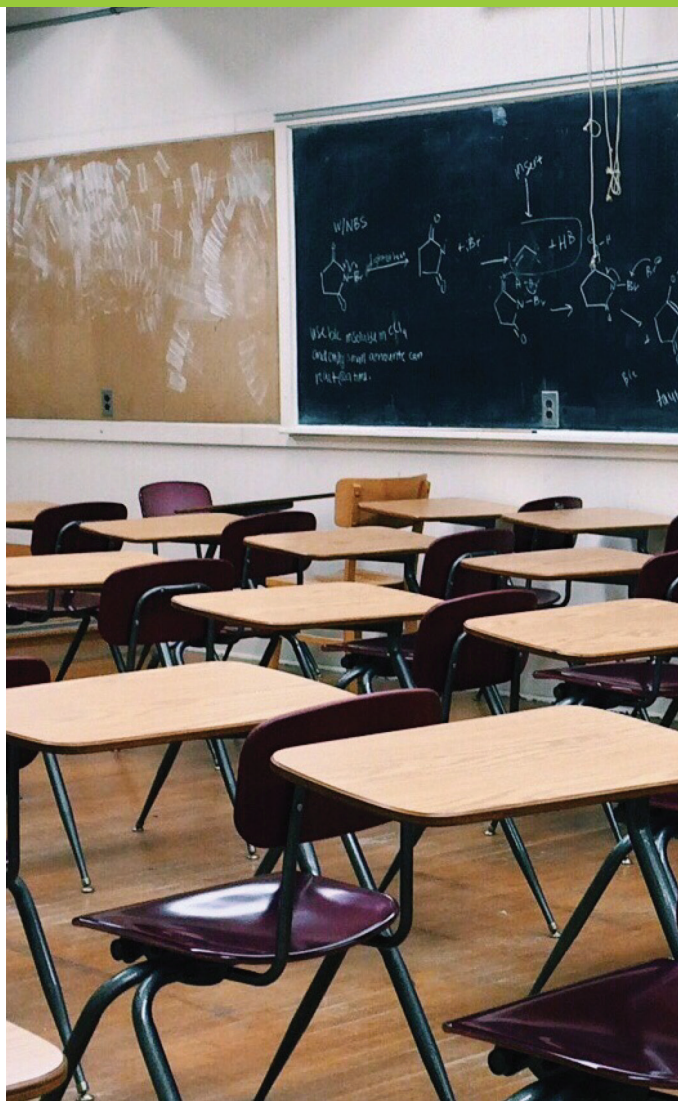

Come, let's go inside!

MEET DR. BRIAN HOUSAND

Dr. Brian Housand, is the coordinator of the Academically or Intellectually Gifted program at University of North Carolina Wilmington. Dr. Housand earned a Ph.D. in educational psychology at the University of Connecticut with an emphasis in both gifted education and instructional technology. He served two terms on

the National Association for Gifted Children's Board of Directors as a Member-At-Large.
